Reverse Vending Machines

Make recycling smart and convenient

Transcend's industrial SSDs contribute to the seamless operation of reverse vending machines by facilitating the automatic sorting, compacting, and storage of recyclable items. These SSDs play a crucial role in recording various parameters, such as item types and volumes, establishing a robust database for reliable system functionality.
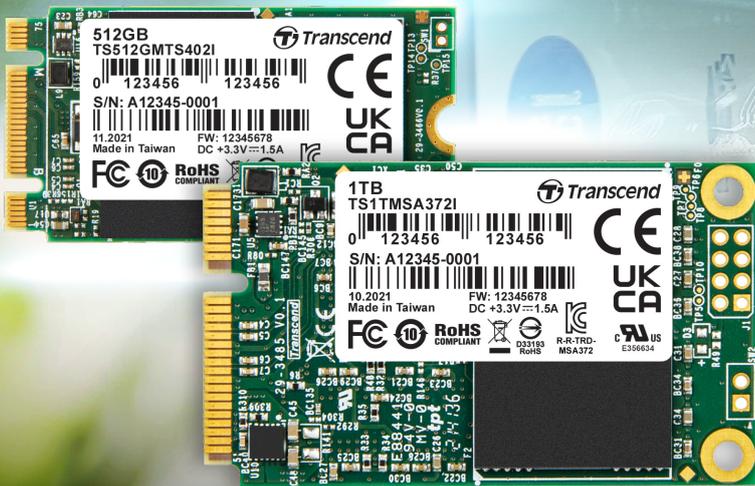

Wide Temperature
Withstand extreme temperature change between -40°C to 85°C.

Product Longevity
Fixed BOM & product lifecycle management (PLM) for long-term supply.

Trustworthy Reliability
In-house chip sorting process and rigorous temperature tests for stable operations.
